Our Commitment to Local Sourcing and Support for Independent Suppliers and Organisations

At Future Focus21c, we are committed to fostering economic growth and sustainability within the communities where we operate. Recognising the role of independent suppliers in driving local economies, we are committed to sourcing 50% of our non-labour expenses from independent suppliers and local organisations, situated in proximity to where the product will be utilised or where our company conducts its operations.

This commitment is rooted in our belief that supporting local businesses not only strengthens the economic fabric of communities but also enhances the resilience and diversity of our supply chain. By prioritising partnerships with independent suppliers and organisations we aim to foster meaningful relationships built on trust, collaboration and mutual benefit.

We use a unique method, the pCr mapping process to map our stakeholders, beneficiaries, suppliers and life cycle analysis to help us make informed decisions and prioritise local regional and national independent suppliers in that order. It should be noted that given our rural location and access to expertise and suppliers this is not always possible. However, by also working with local organisations who provide services we are able to develop sourcing partnerships in innovative and original ways and helps further our commitment and aim to serve 75% local and independent clients or customers

Through this pledge, we aspire to:

- **Empower Local Economies:** By sourcing goods and services from independent suppliers, we contribute to the growth and prosperity of local economies, creating employment opportunities and fostering entrepreneurship.
- **Promote Sustainability:** Utilising local suppliers reduces transportation-related emissions, minimises environmental impact, and promotes sustainable practices by encouraging shorter supply chains and reducing reliance on long-distance transportation.
- **Enhance Community Engagement:** By engaging with local suppliers, we strengthen ties with the communities in which we operate, demonstrating our commitment to being responsible corporate citizens and contributing positively to societal well-being.

- **Ensure Quality and Innovation:** Collaborating with local suppliers enables us to access specialised expertise, innovative solutions, and high-quality products tailored to our specific needs, thereby enhancing the overall quality and competitiveness of our offerings.

As we embark on this journey, we recognise that achieving our goals will require ongoing collaboration, transparency, and continuous improvement. We remain steadfast in our dedication to supporting independent suppliers and fostering sustainable, resilient communities worldwide.
